Ski Mountain Review	Version <1.0>
	Date : 12/7/15

## Introduction

### Purpose

The purpose of this document is to describe the requirement specification for the web site "FreeMountainReview".

The intended audience for this document is skiers and snowboarders

*First it is the contract between you and the client. Second it is for the developer of the site. Two primary goals are:*

1. *Client gets a very good understanding of what you will be delivering.*
2. *Developer has a very good understanding of what they are going to create.*

### Definitions, acronyms, and abbreviations

*Sample for the client:*

HTML – Hypertext markup language – used to define your content.

PHP – Personal Home Page – language that helps to customize html.

CSS – Cascading Style Sheets – used to define the look of a web site.

W3 Validation – refers to both Html and CSS validation tool provided by the W3c.org. the html validator is located at:

<http://validator.w3.org/>

with the CSS validator located at:

<http://jigsaw.w3.org/css-validator/>

SQL – Structured Query Language

FLD – Field

PMK – Primary Key

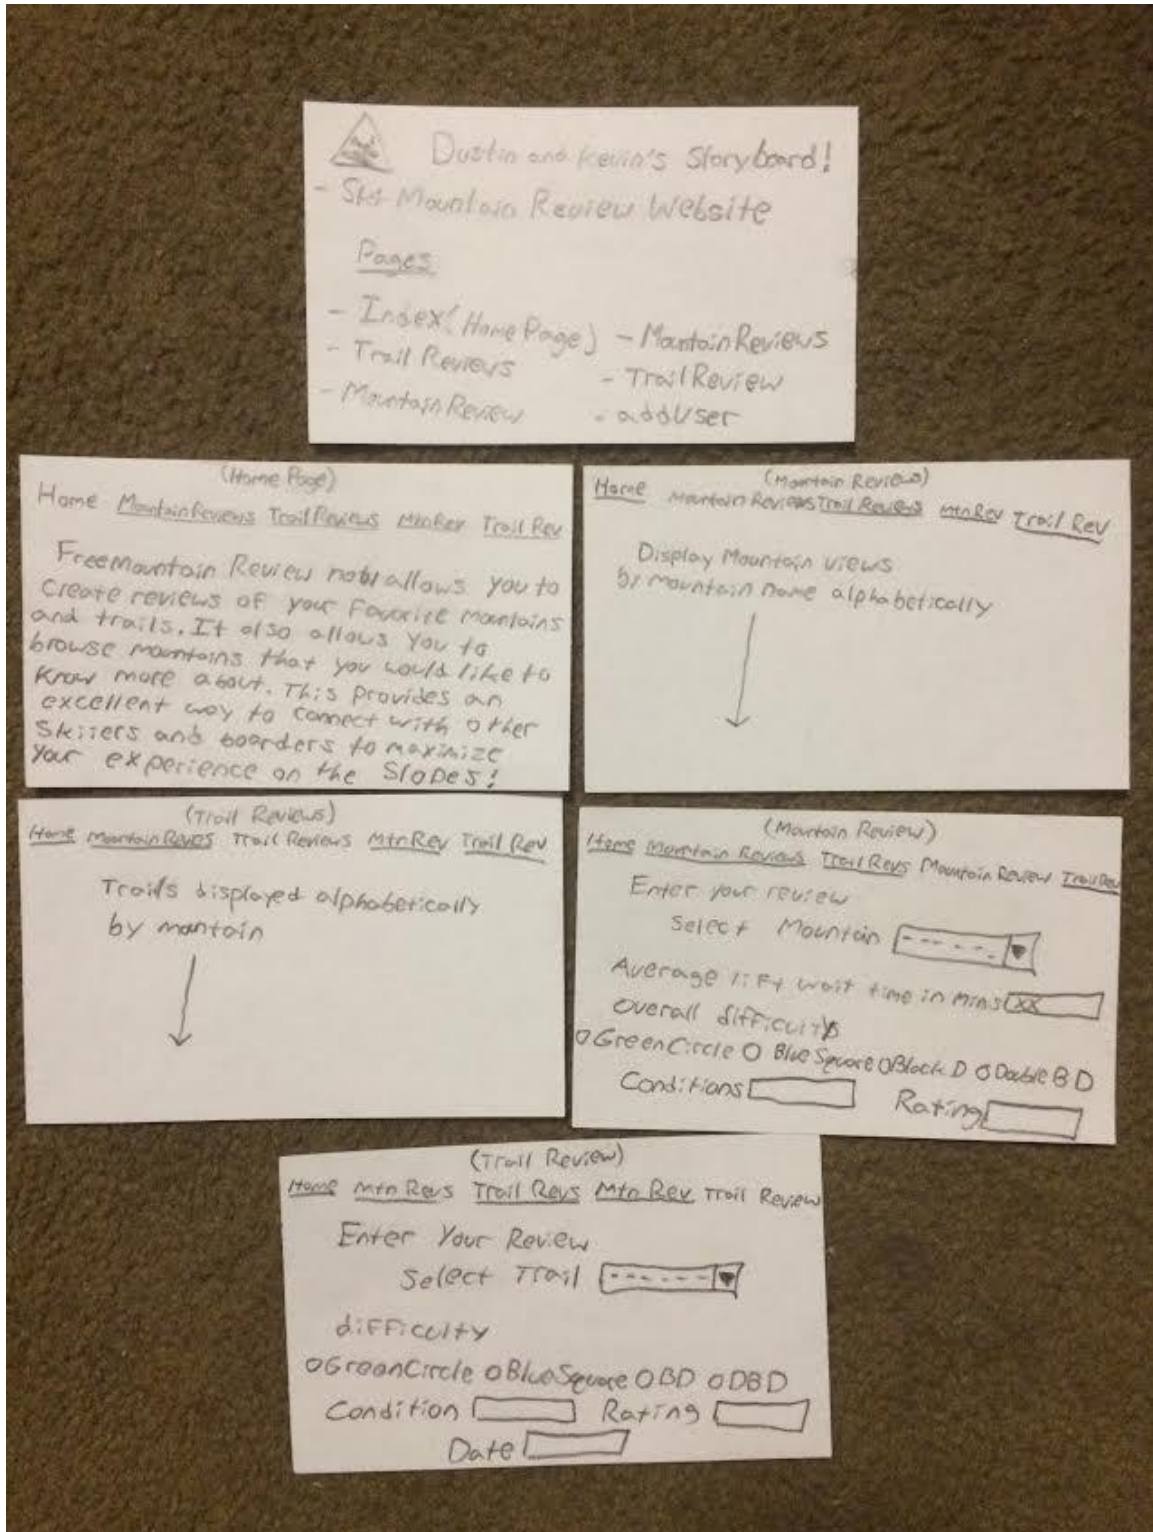

Mtn- Mountain

## Overall Description

FreeMountainReview now allows you to create reviews of your favorite mountains and trails. It also allows you to browse mountains that you would like to know more about. This provides an excellent way to connect with other skiers and boarders in order to maximize your experience on the slopes!

Ski Mountain Review	Version <1.0>
	Date : 12/7/15

## Story Board

Ski Mountain Review	Version <1.0>
	Date : 12/7/15

## Specific requirements

1. *You fill out* – This is where you would put the exact detail of what you want for the project. For example:
2. *Title for main page:* *What is the title, shows up as a link in a search result.*
3. *Meta Description:* *what is the description for the above link.*
4. *Meta Character set:* UTF - 8
5. *Logo:* *pick a logo to be used on the site.*
6. *Main page photo:* *pick a photo of you.*
7. *Content can be found here:*
8. I hope you get the idea. The goal would be the developer would be able to make the entire site based on this document and the client would see you have included everything.
